## FREE SERVICE

Rendered to Shippers by Railroads Reduce the Revenues of the Railroads.

WASHINGTON, D. C., March 28.—Louis Brandeis, counsel for the Interstate Commerce Commission in opposition to the proposed five per cent increase in railroad freight rates, today submitted a statement showing that free services rendered shippers by railroads in classification, territory, result in serious depletion of the revenues of the roads. The special free services under consideration by the commission were free storage, free warehousing, free loading and unloading of cars, free lighterage, free elevation of grain and various other free terminal services.

Mr. Brandeis asserted that the cost to the railroads of these services was so great as to absorb from twenty-five to fifty per cent of the freight rate receipts and in certain instances more than the entire receipts were absorbed, resulting in a substantial cash loss to the roads. Instances were cited showing that the Pennsylvania railroad carried freight on which the free service cost was so great that the service "might as well have been presented as an instance of free transportation" because cost exceeded the total freight charge received. One of these instances was in the handling of grain from Buffalo to Philadelphia. Mr. Brandeis declared that the free service cost to the Erie railroad at New York harbor as applied to 18,153 cars investigated amounted to "at least \$24 a car" about \$435,572.

He especially recommends this stove because of its convenient arrangement, and equal distribution of the heat in the oven, thus assuring even baking on the top, sides and bottom. The split oven doors, the swinging, simmering burner, the asbestos lining which retains the heat, the rust-proof material used in its construction, the big saving of gas and many handy features make this stove the choicest on the market.
